BRETT DICKENSON

SOFTWARE DEVELOPER

PROFILE

Hard-working and experienced software developer with 5+ years of expertise in front-end development. Skilled in modern web technologies, including React, JavaScript, TypeScript, Node.js, and AWS, with a passion for building high-quality, user-centric applications. I have a proven track record of developing software solutions for industries including healthcare, AI, media, and recruitment. I've contributed to projects used by large companies like NHS, Virgin Media and Verizon.

Arriving in Australia September 2025 on a WHV, available for contract, freelance or short-term roles to start.

WORK EXPERIENCE

Pharmacy2u - Leeds, UK (Remote)

Software developer

08/2024 - PRESENT

- Contributing to the digital platform serving over 750,000 patients to ensure timely medicine delivery, focusing on React, Next.js, and TypeScript for frontend development.
- Improved user experience by identifying and resolving bugs and adding new features to enhance platform functionality.
- Collaborating with cross-functional teams including Product Managers, Backend Developers, Designers, and QA to deliver high-quality features aligned with project goals.
- Utilizing Git and Azure DevOps for version control and Jira for task management.
- Daily stand-up meetings help us track progress and discuss blockers.

Pivigo - London, UK (Remote)

Software developer (Lead FE)

03/2022 - 02/2024

- Led the frontend development for a complex web app built using React, SCSS, Redux, and AWS, helping users track social housing tenants with AI predictions.
- Managed the entire frontend architecture and collaborated closely with clients, designers, and backend engineers to meet user requirements.
- I was in charge of the entire frontend and making sure user requirements were met. I worked closely with the clients, product team, designers and backend engineers to make sure the app was built and maintained correctly and any issues/bugs were resolved accordingly.

15Gifts - Brighton, UK (Remote)

Software Developer

09/2021 - 12/2021

- Contributed to the frontend development of a personalized recommendation engine used by major partners like Virgin Media and Verizon.
- Utilized React, Redux, CSS, and Git to develop the engine's features and ensure smooth integration on partner websites.

REFERENCES

"Bretts UI/UX work with Pivigo was exceptional. He built an app that distilled a complex product into a UX of high quality and simplicity for our customers. The work was often breakneck speed, such was the stage of the products evolution, but Brett handles this with ease."

Jason Muller - CEO @ Pivigo

INTERESTS

- AI
- Tech/Web Development
- Gym
- Music

TRANSPORT

- Full UK Driving License

Boardrm - Birmingham, UK (Hybird)

02/2021 - 09/2021

Software Developer

- Helped re-build the entire front-end website job search engine from scratch using React & Redux. Working with apprentice front-end developers, backend developers and the marketing team to help bring the website to life.

BCU Software House Placement, UK

05.2019 - 09/2019

Software Developer

- Designing and developing apps and websites using React Native, Flutter, WordPress, HTML, CSS and JavaScript. Working in teams on real life projects for clients.
- Skills gained:
- Working in a team - Worked in several different teams on various projects, every project was a success and clients were always happy. This included working with Indian Innovation BCU Team to build their website using Wordpress.
- Better programming skills - Learnt new programming skills including react native and working with android studio and flutter. Built a BCU open day app and also an app for a women's charity "women's coin".
- Time keeping - Having deadlines for each project allowed me to keep organised and work well under pressure.
- Communication - Communicated with several different people including, managers, developers, designers and clients which was key in completing tasks set.
